

I am concerned about the proposed requirement to record all programming on domestic radio stations.(1) As a small market broadcaster operating on a very tight budget, I am concerned about the cost of carry out such a mandate.
(2) I am concerned about who would have access to such recordings, and how much it would cost to make access available.

It is unfortunate, in my opinion, that the poor choices of a few broadcasters are affecting those of us who strive to serve our localities every day.

Thank you,
